Shape Template 3

Tag: MyHouse1

Address: abc

Wifi: ☑

Open Faceplate

While on main view, I select "Shape_Template3" and drag and drop it to main page I then set Props/ Params/ Instance_Path= Myhouse1

Shape Template 3

Tag: null

Address: null ⚠

Wifi: ☐ ⚠

Open Faceplate

While on main view, I select Tags/ Myhouse1 and drag and drop it to main page Seems Broken

I added a flex repeater on the page On the flex repeater configuration I set Path= Shape_Template3. Under instances/0 I had to create a property InstancePath and set it to "MyHouse1" This is as per your suggested solution For my application, the shape templates will not be in a row or column but will be scattered. Inorder to follow your solution, do I need to create a flex repeater for every instance?

Shape Template 3

Tag: MyHouse1
